

## *Providing Better Water for Texans*

**TDWS** provides 28 years of professional regulatory experience in the environmental field which focuses on public water system, on-site sewage facilities, and wastewater compliance requirements.

**TDWS** offers expert regulatory guidance and independent consulting services for water and wastewater treatment, and distribution system facility operations and maintenance.

**TDWS** is dedicated to delivering exceptional assistance to achieve effective regulatory strategies and compliance solutions.

**TDWS provides regulatory services which include performing, completion, and coordination of:**

- Pre-inspection compliance audits of public water systems (PWS);
- Plan review materials and submittals for all types of PWS approvals;
- On-Site Sewage Facilities (OSSF) permitting applications;
- Revised Total Coliform Rule (RTCR) compliance requirements for PWSs;
- State and federal rule applicability and inactivation requirements for PWSs;
- Alternative compliance option assessments and strategy development for applicable facilities and PWSs;
- Cross-connection control program and health hazard assessments for PWSs; and
- Technical training and compliance assistance for utility staff and organizations concerning PWS, RTCR, and OSSF regulatory requirements.
